Experience

Crédito Argentino Remote
Software Developer Analyst July 2021 - Today
Participation in all phases of development in various systems, problem resolution, support and maintenance of applications and services, of which I highlight:
• Web application used by the administration team for the creation, modification and deletion of users, and the assignment of permissions for the use of internal applications.
• API used for the operation of a WhatsApp bot, which allows businesses to generate consumer loans for clients.
• Library used to access applications using tokens or second factor authentication.

Education

Instituto de Formación Técnica Superior N°29 Argentina
Tecnicatura superior en desarrollo de software. 2023 - Today
